

Power BI Virtual Training

Making data. Simple.

Take your data modelling to the next level, with our Virtual Power BI training course.

Power BI is one of the most powerful business intelligence platforms available. It's easy to use, when you know how, that's why our one-day training course has been designed to ensure that all delegates leave having massively enhanced their Power BI knowledge.

Delivered through Microsoft Teams, course delegates can follow our expert trainer every step of the way; sharing screens and asking questions as required.

Add value to your business by enhancing how you transform data into information through intelligent visualisations and reporting, allowing management to react quickly to market disruptions to make better business decisions.

What does the course cover?

The course is split into two sections, which cover the following:

Introduction to Power BI

- What is Power BI?
- Where can I use it?
- How can I maximise the tool?
- Power BI desktop and how to analyse data
- Delegates will finish this section by creating their very own data visualisation

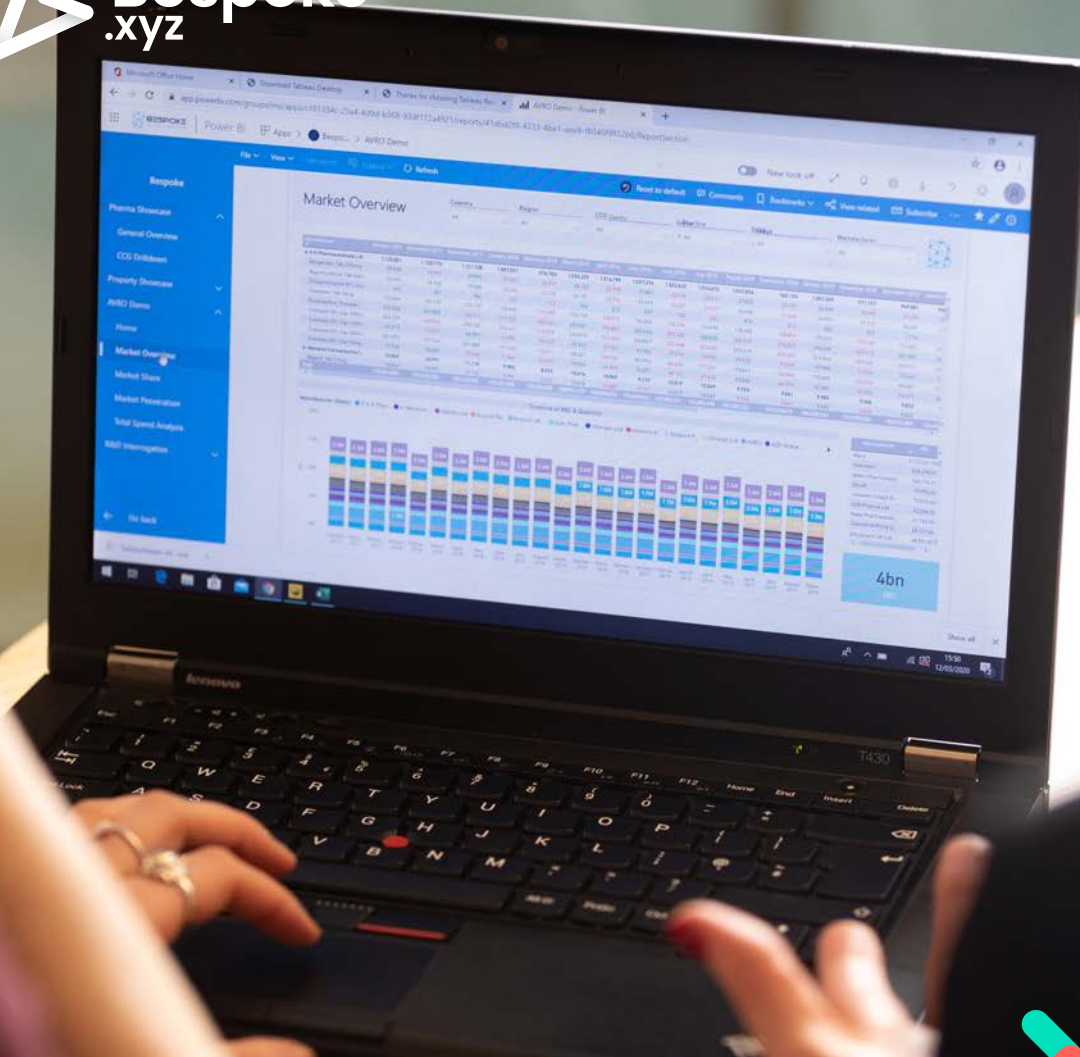

Bringing your data to life

- ▶ Visualise your data
- ▶ Datasets, dashboards and reports
- ▶ Types of visualisations
- ▶ Building a dashboard
- ▶ Publishing and accessing reports

Wherever possible, we will use real-life scenarios applicable to your business, to optimise the learning experience.

Who should attend?

This course is ideal for anyone looking to take the leap into the world of Power BI.

Empower your teams with the Power BI
knowledge they need to make your business
more **productive, efficient and accurate**
